(a) Trust capital gains: For attribution managed investment trusts (AMITs), these are the trust capital gains attributed to members. For non-AMITs, these are the present entitlements to the net trust income comprised of net capital gains and CGT concession amounts.
(b) Discount method: Capital gains made by the trust in respect of CGT assets that were held for at least twelve months at the time of the CGT event that gave rise to the capital gain, and in respect of which the trust has not chosen to use the indexation method (if applicable) to calculate the capital gain. The sum of the discount method components equals the capital gains after having applied a CGT discount of 50%.
(c) Indexation method: Capital gains made by the trust in respect of CGT assets that were acquired prior to 11:45 a.m. (by legal time in the Australian Capital Territory) on 21 September 1999 (and that had been held for at least twelve months at the time of the CGT event that gave rise to the capital gain), and in respect of which the trust has chosen to use the indexation method to calculate the capital gain.
(d) Other method: Capital gains made by the trust in respect of CGT assets that were held for less than twelve months at the time of the CGT event that gave rise to the capital gain.
(e) Non-assessable gains: For attribution managed investment trusts (AMITs), members are to be treated as having included (in their attributed amount) a capital gain of double the trust discount capital gain; thus, the non-assessable amount for AMITs is the additional member amount required to double the trust discount capital gain (referred to as the 'AMIT CGT gross up amount', this amount is equal to the sum of the discount method components). For non-AMITs, the non-assessable amount is the CGT concession amount (as calculated under sub-section 104-71(4) ITAA 1997).
(f) TAP: Capital gains made by the trust in respect of CGT assets that were taxable Australian property (TAP). For capital gains calculated using the discount method, this is the capital gain after having applied a CGT discount of 50%.
(g) NTAP net of foreign tax: Capital gains made by the trust in respect of CGT assets that were not taxable Australian property (NTAP), less any NTAP foreign tax. For capital gains calculated using the discount method, this is the capital gain after first having applied a CGT discount of 50%, and then subtracting any NTAP foreign tax.
(h) NTAP foreign tax: Foreign tax paid by the trust in respect of capital gains made by the trust in respect of foreign CGT assets.
(i) Taxable foreign capital gains: The grossed-up value of capital gains from foreign CGT assets. This amount is for information purposes only, as foreign capital gains are already reflected in the combined value of 'NTAP net of foreign tax' and 'NTAP foreign tax' amounts. This 'Taxable foreign capital gains' amount may be useful for the purpose of determining the extent to which the combined value of 'NTAP net of foreign tax' and 'NTAP foreign tax' amounts has been derived from a foreign source, and, accordingly, the extent to which any NTAP foreign tax amounts count towards the calculation of the portfolio holder's entitlement, if any, to a foreign income tax offset (FITO).

(a) Non-assessable amounts do not include non-assessable amounts in respect of trust capital gains (i.e. the AMIT CGT gross-up amout or the CGT concession amount). The non-assessable amounts relating to AMIT CGT gross-up amounts and CGT concession amounts are disclosed in the 'Trust capital gains' sub-section under the Income - additional information section.

(b) For attribution managed investment trusts (AMITs), 'Other non-assessable' amounts are the reconciliation adjustments required to account for the amount by which the present entitlements to the net accounting income of the trust for the income year exceed the trust income attributed to the member under section 276-80 ITAA 1997 for the income year.

Where the 'Market value' in respect of the CGT parcel is equal to or less than its reduced cost base, its reduced cost base is disclosed as the adjusted cost; otherwise, its cost base is disclosed as the adjusted cost. For more details, refer to the 'Adjusted cost' section of the **Unrealised** report.

(b) Gains calculated using discounted method

(c) CGT gain calculation method

The CGT gain is based on what is optimal for the disposal method selected.
The CGT gain calculated from a less than optimal method is shown in italics for information purposes only and is excluded from the totals for the portfolio.
NA is shown if a calculation method is not applicable.

(d) Unrealised CGT gain or CGT loss

The unrealised CGT gain or CGT loss is the difference between the adjusted cost and the market value at the date requested. For short options, the unrealised CGT gain or CGT loss is the market value of the option at the date requested. (The option premium received is shown as a realised CGT gain in the 'Realised CGT' section.)
CGT gains or CGT losses are not comparable with performance gains/losses, which are based on changes in value for a performance period.
